Retailers Trusted
Since 2015

x2x RMH for QuickBooks automatically moves your retail data from RMH POS into QuickBooks every sale, purchase, inventory movement, and customer record without anyone typing a single number. Your books stay accurate and up to date while your team focuses on running the business.

Save Time

Eliminate hours of daily manual data entry. What used to take your team all morning happens automatically.

Zero Errors

No more re-keying figures between systems. Data flows directly from RMH to QuickBooks with no human intervention.

Always Current

Your QuickBooks reflects real-time sales, purchases, and inventory so your financials are never a day behind.

Before x2x VS After x2x

Your Daily Task	Without x2x	With x2x
Posting daily sales to QuickBooks	Manually re-enter every sale from RMH into QuickBooks — daily, error-prone, time-consuming.	Sales batch auto-syncs to QuickBooks the moment you close the day. Zero manual entry.
Tracking Cost of Goods Sold	Calculate COGS manually from RMH reports and enter into QuickBooks separately.	COGS is captured automatically with every sale sync. Always accurate.
Managing customer records	Maintain separate customer lists in RMH and QuickBooks. Updates must be done twice.	Customer records sync between both systems automatically. One update, both systems.
Reconciling vendor purchases	Enter purchase orders and vendor invoices manually into QuickBooks after receiving in RMH.	RMH purchases post to QuickBooks AP automatically. Vendors auto-created if new.
Tracking inventory movements	Manually record stock adjustments, transfers, and write-offs in QuickBooks by hand.	Every inventory movement in RMH syncs to QuickBooks instantly. Always in balance.
Month-end close	Days of reconciliation — cross-checking RMH reports against QuickBooks entries.	Books are always current. Month-end is a review, not a data entry marathon.
Managing multiple stores	Repeat every manual task for each store. No central view of financials.	All stores sync through RMH Central. One Integration, complete financial picture.

ROI Calculator How Much Will You Save?

Use the table below to estimate your savings. Find the row that matches your business size. These are conservative estimates based on real customer data from retailers using x2x.

x2x RMH For QuickBooks

Business Profile	Hours Saved per Month	Staff Cost Saved/Month (at \$25/hr)	Error Cost Avoided/Month	Total Monthly Savings	Annual Savings
Small Retailer 1 store, 200 sales/mo	15 hrs	\$375	\$150	\$525	\$6,300
Growing Retailer 1 store, ~500 sales/mo	25 hrs	\$625	\$300	\$925	\$11,100
Active Retailer 2-3 stores, ~1,000 sales/mo	45 hrs	\$1,125	\$500	\$1,625	\$19,500
Multi-Store 4+ stores via RMH Central	80 hrs	\$2,000	\$900	\$2,900	\$34,800

* Hours saved estimated based on average manual accounting time reported by x2x customers. Error cost includes reconciliation time, accounting corrections, and restatements. Actual savings will vary based on transaction volume, number of staff, and hourly rates.

What Gets Synced Between RMH and QuickBooks

Sales & Revenue	
Sales batch sync — every RMH transaction posts to QuickBooks automatically	Cost of Goods Sold (COGS) tracked accurately per sale
Cash and credit sales both captured	Deposits and rounding handled automatically
Customers & Receivables	
Customer records downloaded from QuickBooks to RMH	New RMH customers uploaded to QuickBooks automatically
Accounts Receivable (AR) kept in sync across both systems	
Purchases & Payables	
RMH purchase orders posted to QuickBooks	Vendor records downloaded and uploaded automatically
New vendors auto-created in QuickBooks from RMH purchases	Accounts Payable (AP) tracked and updated
Inventory	
Inventory adjustments synced in real-time	Inventory transfers in and out recorded in QuickBooks
Multi-store inventory movements tracked via RMH Central	
Accounting & Automation	
General Ledger (GL) uploads scheduled automatically	Accounts mapping customized per store
Scheduler runs syncs on your preferred schedule	Activity Log records every transaction for full audit trail

Works with QuickBooks Online. Supports single-store and multi-store setups via RMH Central.

Multi-Store Support

How RMH Central Works with x2x

If you run more than one retail location, x2x integrates with RMH Central — the hub-and-spoke system that manages all your stores from one place. Every store syncs its own data to QuickBooks automatically, and you get a unified financial view.

Company)

What Multi-Store Sync Gives You

Per-Store Account Mapping

Each store can have its own chart of accounts mapping in QuickBooks — so Store 1 and Store 2 post to separate income and expense accounts if needed.

Per-Store Batch Configuration

Set different opening sales batch dates and posting schedules for each store independently.

Centralized Inventory Transfers

When stock moves between stores, both the sending and receiving store sync the transfer to QuickBooks automatically via RMH Central.

Unified Financial View

All stores feed into one QuickBooks company file. Run combined or store-by-store P&L; reports any time.

Scalable — Add Stores Anytime

Start with one store and add more as you grow. Each additional store is configured independently with no disruption to existing setups.

Inventory Transfer Tracking

Transfer In and Transfer Out movements between stores are logged in QuickBooks with full detail — which store sent, which received, and when.

Choose the Right Plan for Your Business

All plans connect RMH to QuickBooks. The difference is which sync modules are included. Start with what you need today — you can always upgrade as your business grows.

Free Plan Try all features 10 transactions/month	Basic Plan Sales sync Unlimited transactions	Standard Plan Sales + Purchases Unlimited transactions	Extended Plan Sales + Purchases + Inventory + Admin
\$0 / month	\$45 / month	\$60 / month	\$75 / month
